

# Final Report

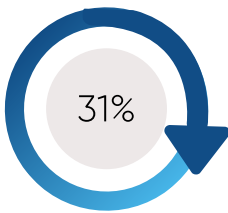

February 2020

# The Results

## Air Quality Improvement:

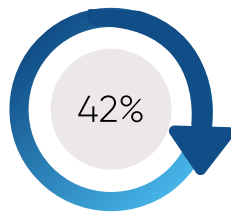

In weeks 2-3, Aura operated in a hotel guest room. The device disinfected and purified the air, significantly reducing the amount of harmful particles and parameters in the room:

### VOC

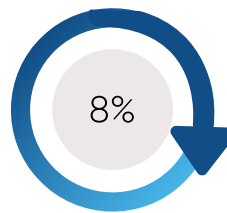

VOC levels were decreased by 31% as a result of the Ray Filter's Carbon layer

### PM 2.5

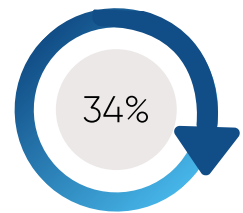

PM 2.5 levels were decreased by 42% as a result of the Ray Filter's HEPA layer

### PM 10

PM 10 levels were decreased by 8% as a result of the Ray Filter's HEPA layer

### CO2

CO2 levels were decreased by 34% as a result of our recommendations
